

Building Integrated PV Thermal Modules

- * Industry-leading solar space and water heating; PV and daylighting systems
- * New construction and retrofits
- * Modular assembly for easy field installation
- * 25-year warranty
- * Up to 22 watts per square foot (kWH-PV + kWH-T)
- * Fully integrated into roof = lower maintenance costs
- * Daylighting options
- * Many sizes available
- * Structurally engineered
- * Insensitive to existing roof age

DSSI PV-Thermal Daylighting Modules

Replace your failing flat roofing system with long lasting metal roofing systems

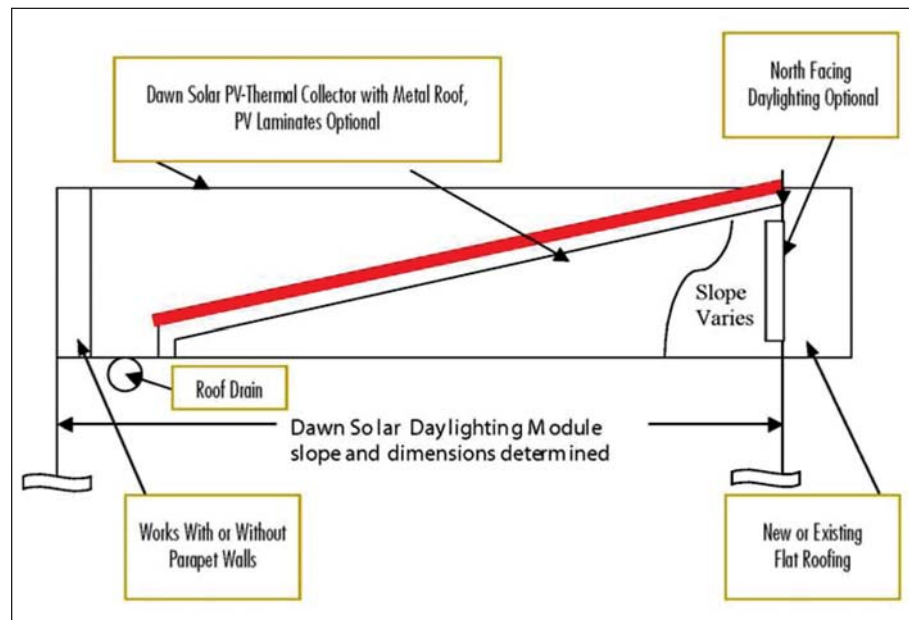

These systems can optionally...

- * Collect solar energy as heat for hot water, pool or space heating
- * Collect solar energy and generate electricity
- * Introduce natural lighting with north facing windows
- * Provide natural heated air for makeup purposes

Overall these systems can reduce your facility operating costs by...

- * Replacing electric lighting with natural illumination
- * Preheating water and process applications with solar energy
- * Generating electricity from solar energy, and with grid tied solar electric applications, reduce your facility's overall electric consumption
